Mirror XB (DMX) **PA-MI-50100**

Mirror XB (RF) **PA-MI-20100**

Combining the function of a stunning mirror and an exceptional lighting element, the Mirror XB is the perfect solution for uniquely embellishing any indoor environment. Controllable by DMX or RF remote control, the reflecting surface of the Mirror becomes translucent when illuminated, paving the way for the appearance of a fascinating source of colorful light, pulsating in a broad range of different modes. Equipped with high performance LEDs, the Mirror XB allows for the generation of very strong and intense colorings, bathing even bright surroundings in a mesmerizing sea of colorful light.

Providing the possibility of being used individually or in multi-panel installations, the Mirror XB leaves nothing to be desired when uniquely decorating any architectural creation and is an eye-catcher in any environment.
